WHERE DOES THE RULE ACTIVATE, FAIL AND EXIT?

NSE/BSE / INR | DECISION PROTOCOL | 2011-06-14 TO 2026-10-12

PRE-HOLDOUT LOCK: 20D BOLLINGER 2.0X | CURRENT REGIME: DOWNTREND / HIGH VOL

NO QUALIFIED SETUP

₹1,158.80

AS OF 2026-10-12 CLOSE

NO QUALIFIED SETUP	N/A	N/A	33.3%	0.77x
SETUP	ACTIVATION	RISK WIDTH	OOS SUCCESS	PAYOFF

01 Decision map

ADJUSTED DAILY

CURRENT DECISION

NO QUALIFIED SETUP

Suppressed because the pre-holdout winner did not qualify out of sample.

KEY INSIGHT **No decision coordinates are published unless the rule clears the untouched holdout and robustness gates.**

02 Exact decision protocol

CLOSE TO NEXT OPEN

STOP: NO ROBUST EDGE

No entry, stop or target is published when the tested rule fails the final evidence gate.

FINAL EVIDENCE GATES

ENOUGH OOS TRADES	PASS
POSITIVE OOS RETURN	FAIL
PROFIT FACTOR >= 1.05	FAIL
POSITIVE OOS SHARPE	FAIL
DRAWDOWN <= 25%	PASS
SURVIVES HIGHER COST	FAIL
NEIGHBOR RULES STABLE	FAIL

KEY INSIGHT **Failing closed is a valid result, not missing analysis.**

03 Why trust this rule?

UNTOUCHED HOLDOUT

20D BOLLINGER 2.0X

OOS 2022-12-14 TO 2026-10-12 | 15 BPS / SIDE

33.3%	0.77x	-1.1%
SUCCESS RATE	PAYOFF RATIO	EXPECTANCY

PROFIT FACTOR	MAX DRAWDOWN
0.39x	8.1%
COMPLETED TRADES	MEDIAN HOLD
6	10 sessions
60 BPS STRESS	NEIGHBORS POSITIVE
-11.9%	0%

READ THE SUCCESS RATE WITH THE PAYOFF

33.3% of completed OOS trades won; the average winner was 0.77x the average loss. Expectancy was -1.1% per trade.

KEY INSIGHT **The pre-holdout winner failed at least one final evidence gate.**

Source: Yahoo Finance via yfinance; adjusted daily OHLCV fetched 2026-10-12T07:07:23+00:00. Input hash 47cdd151bfbc02d4.

Tested rule: 50% training / 25% validation / 25% untouched holdout; next-open execution; 15 bps per side; 30, 60 bps stress; adjacent-parameter gate.

Important: the historical result uses the stated rule exit. Fixed invalidation and 1R/2R levels are planning references, not backtested exits.

Research output — not a recommendation. The reader decides whether to act.
